CLAUDE CODE SKILL

Nav Fusion Media · QS — Shorts Scheduler

Turns a batch of unlisted Quantum School shorts into SEO-ready, scheduled and playlisted videos. You answer three short forms and approve one table. The skill does the rest in YouTube Studio.

RUN IT	`/nfm-qs-shorts-scheduler`
OR WITH A HINT	`/nfm-qs-shorts-scheduler kal ke EVS aur Maths shorts schedule kar do`

01

Optimize

Hindi-first title, description and 12 tags written from each short's transcript.

02

Schedule

IST slots (EVS 17:00–23:00, Maths 17:30–23:30, hourly). Skips taken slots and overflows to the next day.

03

Playlist + related

Adds each short to its subject playlist and sets the related long video.

Inside: setup · the flow · Form 1 · Form 2 · Form 3 · a full example run · rules and troubleshooting.

Setup (once per computer)

01 **Install the skill.** Clone the GitHub repo into your Claude Code skills folder:

```
git clone https://github.com/<org>/nfm-qs-shorts-scheduler ~/.claude/skills/nfm-qs-shorts-scheduler
```

Restart Claude Code. Typing `/nfm` should show the skill.

02 **vidIQ MCP for Quantum School** (`vidiq-qs`) connected with the channel owner account. The skill only reads with it.

03 **Claude in Chrome** extension connected, signed in to YouTube Studio as **@quantumschool45**.

04 **Turn the vidIQ Chrome extension OFF** on studio.youtube.com. Its buttons catch clicks and rewrite descriptions and tags.

What happens when you run it

1 **Forms** 3 forms: run, per subject, custom	2 **Read** Lists unscheduled shorts, reads transcripts	3 **Draft** Subject, answer check, title, description, tags
4 **Approve** ONE table. Nothing is changed before this.	5 **Apply** Studio edits, one short at a time, each checked	6 **Report** Final table, skipped list, re-check

> After you approve, the skill finishes without asking anything else. Keep Chrome open. A run of about 30 shorts takes a while because Studio saves one video at a time.

Form 1 — the run

Always shown first. The first option is pre-selected from the defaults, or from what you typed after the command.

Other: `EVS=17:15,18:40,21:00 Maths=19:10,22:30`.
Extra videos move to the next day at the same times.

TAGS

Extra tags or hashtags for every video?

- ● **None (Recommended)**
- ○ Other
  type your own value

Other: `tags: पर्वत, mountains hashtags: #EVSQuiz`.
Max 15 tags / 500 characters.

DESC LINE

Extra line in every description?

- ● **None (Recommended)**
- ○ **WhatsApp Channel link**
  whatsapp.com/channel/0029Vb8m...
- ○ Other
  type your own value

Other: type the line. It goes just above the hashtags.

NOTES

Any other custom instruction for this run?

- ● **None (Recommended)**
- ○ Other
  type your own value

Other: free text, e.g. “earthquake wale shorts skip karo”

> Custom input can’t break the rules. Banned words (PYQ, Free Level Check, free test, Class 9) are rejected, and the plan won’t build until they’re removed.

Example run — 34 new EVS shorts

A real dry run on 17 Oct 2026 for the shorts uploaded as "17 October 2026".

TYPED	`/nfm-qs-shorts-scheduler kal ke EVS shorts schedule kar do, WhatsApp link bhi`

FORM	ANSWER
1 · Subjects / Date / Videos / Mode	EVS · Tomorrow (18 Oct) · All unscheduled shorts · Optimize + schedule + playlist
2 · EVS	17:00–23:00 · 60 min · EVS · Shorts · related: Transportation Challenge
3 · Custom	Desc line: WhatsApp Channel link · everything else None

What the skill found

— 34 unscheduled shorts, all **EVS** (mountains + disaster management), read from transcripts.

— **1 duplicate skipped:** W5vUrcfxZ0k is the same video as AVB2aA4RLKg.

— **Answers checked:** 2 looked wrong in the transcript, but the on-screen board confirmed both were right.

— **18–24 Oct EVS slots are already taken**, so the first free slot is **24 Oct 23:00**.

The final report

After all saves, the skill re-opens 2–3 random shorts plus the first and last, checks every field, and gives you:

ID	SUBJECT	SLOT IST	PLAYLIST	STATUS
0HFlE-J2FVQ	EVS	24 Oct 23:00	EVS · Shorts	Scheduled ✓
-JzX5mFOuw8	EVS	25 Oct 17:00	EVS · Shorts	Scheduled ✓
… one row per short, then: skipped (with reason) · held back for a wrong answer (wrong → correct) · errors and fixes · anything you need to do				

> Held-back wrong-answer shorts can be exported as a review PDF for the team (thumbnail, link, wrong vs correct).

Rules the skill always follows

One approval. A single table before any change, then it finishes without more questions.

Public stays public. It never changes the privacy of an already-public video.

No new playlists. If a name isn't found, it asks.

Unclear subject → skipped. It reports the short instead of guessing.

Wrong answer → held back. Not scheduled; listed with wrong → correct.

SEO rules. Hindi-first title ≤70 characters ending #shorts · 10–15 tags · Class 6 only, never mixed with Class 9 · स्मृति-आधारित / पैटर्न-आधारित, never "PYQ" · never promise a free test or Free Level Check.

If something goes wrong

YOU SEE	DO THIS
vidIQ says "verification required"	Nothing. The skill switches to Studio automatically.
Studio shows "Oops" or the wrong account	Chrome switched browsers; the skill switches back. If it repeats, open Studio in your main Chrome profile.
A "Leave site?" popup	Click Leave/Stay yourself. The skill can't click browser popups.
Descriptions or tags change by themselves	The vidIQ Chrome extension is on. Turn it off for studio.youtube.com.
Run stopped (usage limit or closed laptop)	Run the skill again and say "continue". It resumes from its progress file and never redoes saved shorts.
Plan refused: "banned phrase" or "title 72 chars"	The skill rewrites and re-checks it. Only your custom text needs your fix.
